Copyright, 1920, Faries Mfg. Co.

This catalogue is protected by United States Copyright, owned by Faries Manufacturing Co. The copying of its subject matter is an infringement which will be vigorously prosecuted.

PROTECTION

We protect our customers in the use of our products and assure them of their superior quality, practical construction, artistic design, new metal, and in all ways satisfying the requirements of the user, and cheapest in the end. We are rapidly securing patents on all of our original articles and are protecting them against all copyists.

BUY FROM THE ORIGINATORS

DESIGN PATENTS

Our many Design Patents on Fixtures and Fittings include their particular ornamentation and detail both in general appearance and in special features, also their characteristics in outline and shape. Any similar designs that may be mistaken "by the casual observer" to be the same things, or that appeal to the artistic emotions as the same, come under the law as colorable imitations and unfair substitutes.

WE HAVE LICENSED NO PERSONS OR FIRMS TO MANUFACTURE ANY OF OUR DESIGNS OR ANYTHING SIMILAR TO THEM FOR THE PURPOSE OF SELLING TO THE TRADE.

We are continually originating new designs and devices for the Electrical Trade which we are patenting for the protection of our trade and against unfair copyists.

WARNING

United States Patent Law provides a penalty of $250 for making, selling or OFFERING FOR SALE an infringing article, as well as court costs, damages shown, and an injunction covering same. Several cases have already been tried, injunctions handed down and penalties collected against the unlawful making of infringements.

BUY FROM THE PATENTEES

MECHANICAL PATENTS

Our Patents and Patent Pending on any Device are written to cover all important Mechanical features of that Device. In a mechanical patent the design and artistic features are not considered; the mechanical elements alone are involved. The claims of our inventions are such as to cover all practical forms for the specified uses. Therefore the change of design would not avoid infringement.

ANNOUNCEMENT—TO OUR TRADE

Please Read These Pages Carefully. It Will Prevent Errors and Perhaps Misunderstandings

WE take pleasure in presenting herewith a completely revised and up to date Catalog No. 27 showing a variety of the latest designs in the FARIES patent adjustable electric brackets, portables, and metal shades, also a line of electric combination and gax fixtures and brackets, canopies, fittings, etc. The majority of the fixtures, however, are especially adapted for high efficiency lamps.

The same high quality will be maintained in these goods that has made the Faries line recognized as the leader and standard in the trade since 1880.

All material shown in this catalog, where it is practical to do so, is packed in paste-board boxes which enables our trade to carry these goods in stock without deterioration.

All portables shown in this catalog have a heavy sheet of felt on the bottom of base so that they will not scratch or mar a desk or piano.

We are continually adding to our line and at any time you do not find what you want, write us describing your wants or send us a rough sketch, and we may possibly have the goods in stock or be willing to make them for you.

PRICES—All former prices or quotations are hereby superseded for goods shown in this catalog. Prices are given in connection with each cut, but do not include shades, lamps, electric shade holders, sockets, wiring or insulating joints unless specified. Gas fixtures include gas holders, pillars and tips. Where socket covers are shown price includes same. Discount to the trade will be quoted upon application. Prices are subject to change without notice.
Our minimum charge is 50c.

TERMS—Net thirty days from date of invoice, or 2% for cash within ten days.

REFERENCES—Unless you know yourselves to be well reported, by the commercial agencies, money should accompany order, or satisfactory references be furnished.

C. O. D.—We will send goods C. O. D., but as a guarantee of good faith the parties so ordering will be required to remit with order an amount sufficient to pay transportation charges both ways, which will be deducted from the bill.

LENGTH—Length is given in connection with each cut and upon chandeliers, means to the lowest point of the fixture, not including glassware. Extra length will be furnished at prices specified throughout the catalog.

SPREAD—Spread is given in connection with each cut, and upon gas and combination fixtures is measured from nozzle to nozzle, and electric fixtures, from end of socket to end of socket, upon showers width of spinning, brackets to end of nozzle.

HOW TO ORDER—Order by catalog number and name of goods, stating number of lights and finish desired. Please do not use the words, "Same as last." State whether goods are to be sent by freight or express. Unless preference is given, we will ship according to our best judgment.

WIRING—We list a number of portables, where they are difficult to wire, wired complete with hood. We also show a list price for wiring portables under each cut. The wiring of these portables includes cord, socket and plug, but no shade unless specified. For the convenience of our trade, we will make the following charges for wiring fixtures and brackets: Wall brackets shown on pages 79 to 113 inclusive, list price 60c per light, electric fixtures regular length, list price 75c per light. These prices do not include sockets, shades or shade holders. Sockets, shade holders and glassware will be found listed in this catalog.

FINISH—When ordering, state finish desired. If none is indicated, we always send Brushed Brass. We will furnish Polished Brass, Rich Gilt, Old Brass or Black Iron at the same price as Brushed Brass. Nickel Plate, Gun Metal, Flemish or Antique Brass, Brushed Copper, Oxidized Copper, Statuary Bronze, 10% advance, except where otherwise specified. Verd Antique, Roman Gold, White Enamel or Old Ivory, 20% advance. Antique Silver, 25% advance.

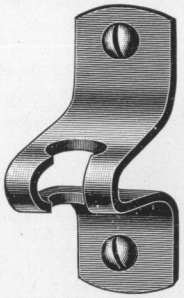
OUR RESPONSIBILITY—We use every care in packing our goods, and our responsibility ceases when we have obtained carrier's receipt in good order. When goods are received in bad order, we suggest calling the attention of the carrier's agent, securing the endorsement of the fact on your bill and file your claim with the carrier's agent at once. If there are any errors, report them to us fully at once, referring to the date of shipment and invoice, and we will correct at once or advise you what to do. **Goods returned to us without our instructions will not be received.**

PACKING AND CARTAGE—Our charge for boxing will always be reasonable, charging only enough to cover cost of material used in putting up goods. **For Parcel Post there is an extra charge for special packing. No charge for cartage.**

BRASS AND ALUMINUM CASTINGS—We are furnishing chandelier and fixture manufacturers in all parts of the country castings from their own patterns as well as from a very large line of our own. If you are using castings, it will pay you to write us. We can furnish you the right kind at reasonable prices. We also make a complete line of turnings, spinnings and stampings for fixture manufacturers.

SPECIAL ORDERS—Special order work not subject to cancellation.

Wall Plates, Swivel, Outlet Box Covers, for Adjustable Brackets



No. 518

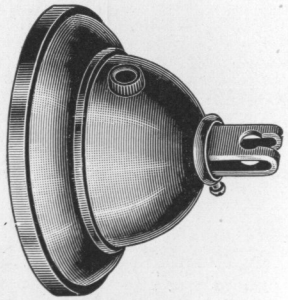
Wall Plate for Adjustable Brackets

Extension 1¼ inches

Standard Package 24

Per 100

Brushed Brass.....**$25.00**



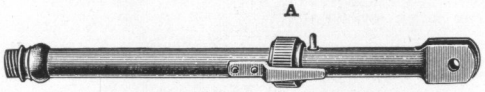
No. 520

Canopy Wall Plate and Tripod for Adjustable Brackets

Extension 3½ inches

Standard Package 12

Brushed Brass.....**$ .70**



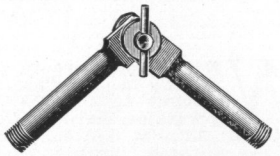
No. 521

Tubing ⅜ inch. 6 inches Long

Brushed Brass.....**$ .70**

Swivel shown at A put on any bracket where it is not shown in Cut, **50c** Extra.

The Swivel, shown at A, allows the lamp to be turned to any position the same as one might turn his hand upon his wrist, only the motion is less limited, and it will stay wherever placed. The greatest amount of light is obtained from the side of the lamp, but when Brackets without the swivel are used it is sometimes impossible to throw the light from the side of the lamp upon the spot desired. The swivel enables the light from the side of the lamp to be reflected right where it is wanted.



No. 519

Adjustable Joint Tubing ⅜ inch. 4 inches Long
Standard Package 12

FARIES FIXTURES

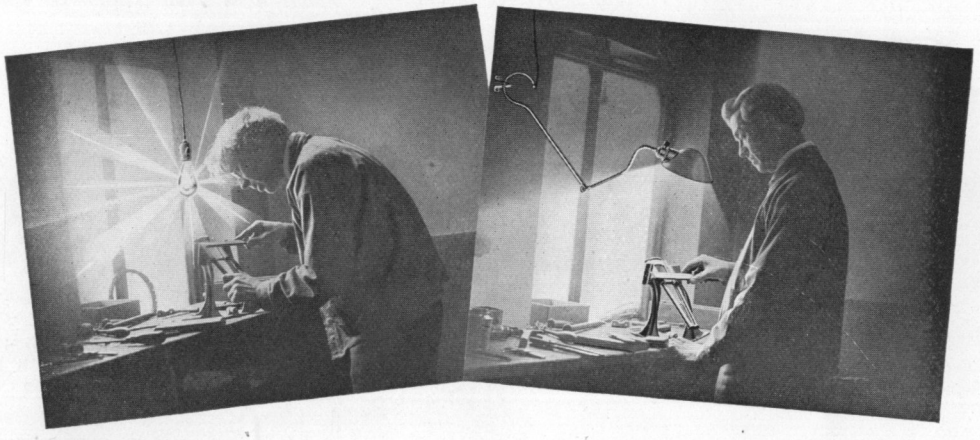
Adjustable Brackets in Actual Use

WORK THAT REQUIRES CONCENTRATED LIGHT

"Applied" light in the shops—for bench work—on small machines—over looms or **wherever** it's necessary to **bring out the details** is absolutely essential.

With it more accurate work is possible, valuable time is not wasted getting fine adjustments—pulleys and belts cannot dim or flicker the light—eye strain is lessened and fewer accidents result.

To get concentrated light in your factory does not mean that you have to increase your overhead lighting facilities—install more lights or use more current. **Simply "spot light" every job.**



LIGHT ON THE WORK—NOT THE WORKMAN

means better work and bigger production. Here is a **fixture that stays where you put it and throws** light **on the WORK but** does not blind the workman.

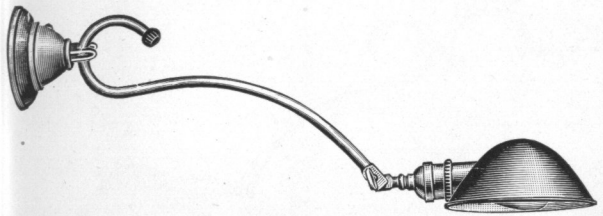
THIS ADJUSTABLE BRACKET

is cleverly designed to be moved from point to point by locking in eyes placed wherever there is occasion to use a light. Further, it may be tipped at any angle by a simple motion—once an adjustment is made it stays that way until changed. It can be swung from one side to the other. For close lighting of fine work the Faries Adjustable Bracket is especially valuable. There are thousands of these brackets in use, in some of the most up-to-date plants in the country.

WE have adjustable brackets suitable for practically all places where Electric Light is used.

Adjustable Brackets

Adjustable to any Position, for Office, Store or Residence
Furnished with Approved Insulator



No. 526

Tubing ⅜ inch. Length 22 inches Over All
With Hinge Joint and Canopy
Standard Package 12

Prices do not include Shades, Lamps, Shade Holders, Sockets or Wiring

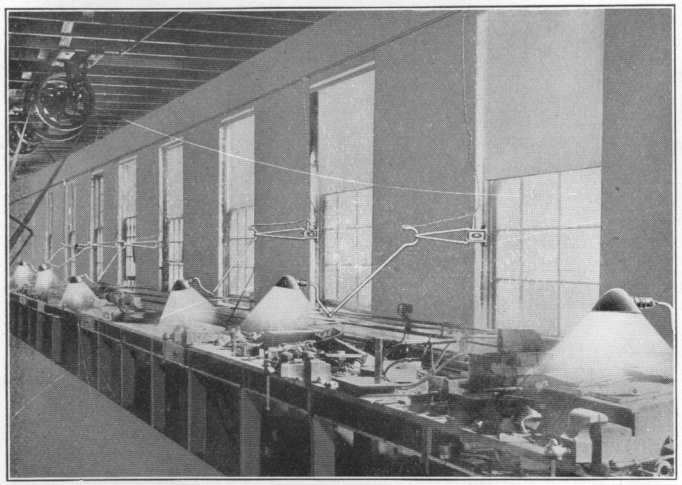
FARIES FIXTURES

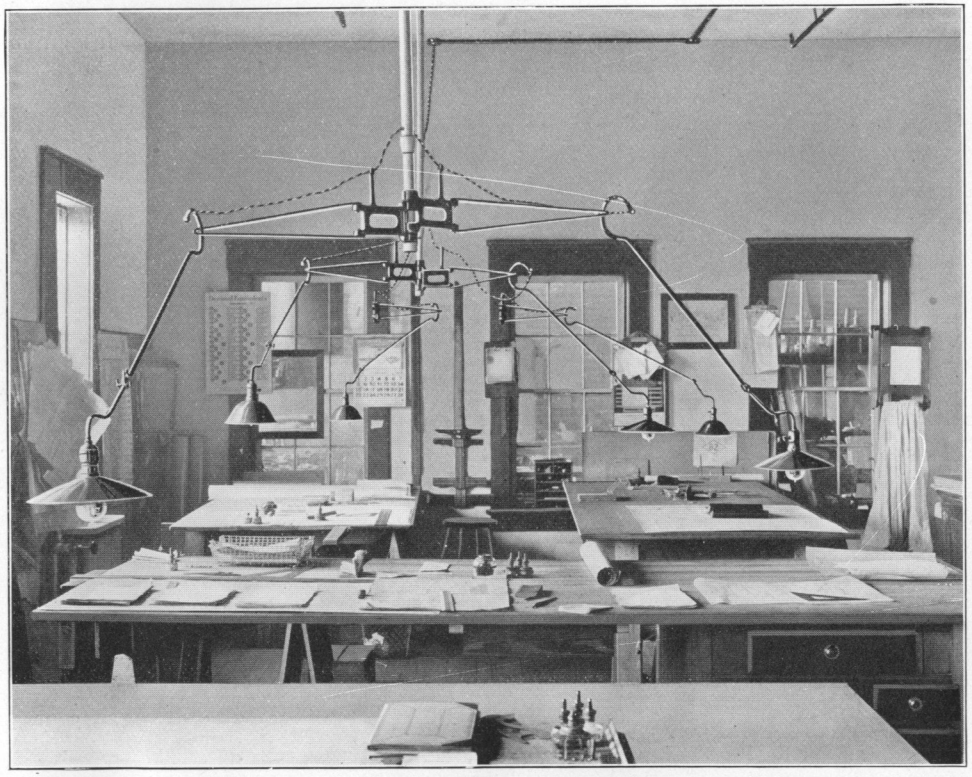
Adjustable Brackets in Actual Use



BRING OUT THE DETAILS!

Then accurate and rapid work is possible—your skilled workmen won't waste their time and your money "fussing" over fine work and trying to get adjustments in dim light or shadow.

These Brackets "stay put" just where needed—keep the glare out of the workmen's eyes and concentrate the rays directly on the work. "Spot lighting" the detail work is the method that is cutting costs in hundreds of plants.



THE No. 6 BRACKET SOLVES ANOTHER DIFFICULT LIGHTING PROBLEM

Drafting requires the best possible light. There can be no shadows, no glare, no flickering, no weak diffusion of light. Ideal daylight conditions must be closely approximated.

In meeting these conditions, utmost care in the selection of proper lighting fixtures is absolutely **essential.** The photograph shows how easily this fixture meets every requirement.

Adjustable Brackets

Adjustable to any Position. Especially adapted for Office, Factory, Store, Doctor or Dentist. Furnished with Approved Insulator

No. 7

Tubing 7-16 inch. Length 5 feet
Has a Hinged Joint and Swivel

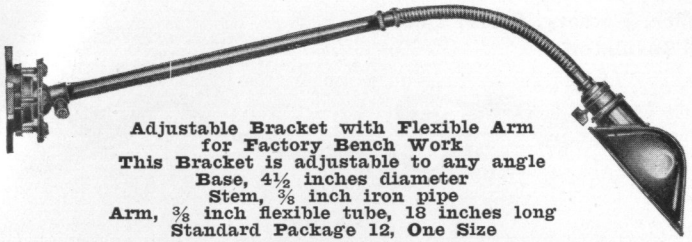
FARIES FIXTURES

Adjustable Brackets



Adjustable Bracket with Flexible Arm for Factory Bench Work
This Bracket is adjustable to any angle
Base, 4½ inches diameter
Stem, ⅜ inch iron pipe
Arm, ⅜ inch flexible tube, 18 inches long
Standard Package 12, One Size

No.		Length Over All Inches	Price Each
78A	Finish Black Japan.....	36	$7.00
78B	Finish Black Japan.....	48	7.35

No. 11D. At the ceiling there is a thoroughly practical ball-joint, allowing the stem to be instantly and firmly placed in any desired position. The arm is attached to the stem with a heavy adjustable joint and the arm is also provided with an extra adjustable joint which permits the raising or lowering of the arm to any position or angle. This is the sturdiest and most practical factory fixture ever built.

Base, 4½ inches Diameter. Stem, ⅜ inch Iron Pipe
Arm, ⅜ inch Brass Tube with Approved Hinge Joints
Standard Package 12, One Size

No.		Length Over All Inches	Price Each	No.		Length Over All Inches	Price Each

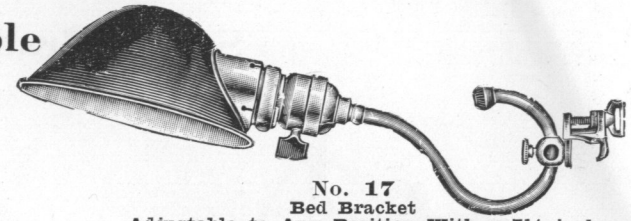
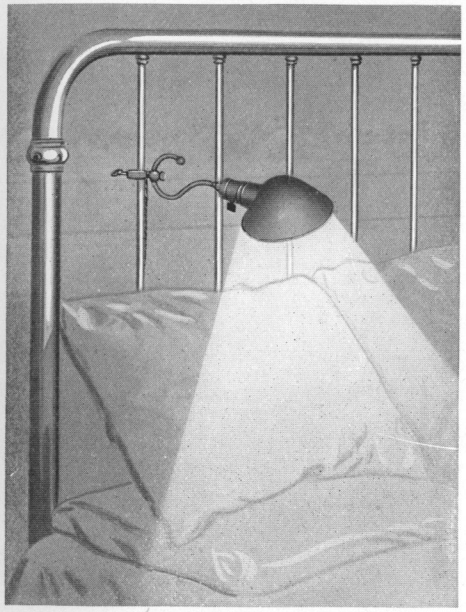
Either Bracket wired with 9 ft. silk cord Key Socket, Plug and Brushed Brass Shade as shown.....**$4.80**

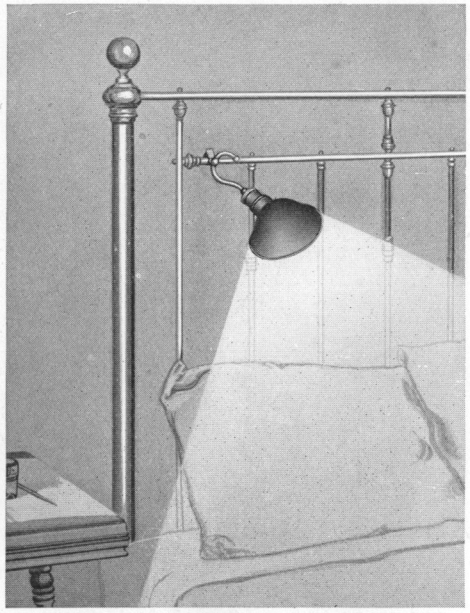


No. 17
Bed Bracket
Adjustable to Any Position With a 7½ inch Extension Standard Package 12
Fits Any Wooden Bed Post or Rail from ¾ inch to 1¼ inch
Brushed Brass.....**$1.60**



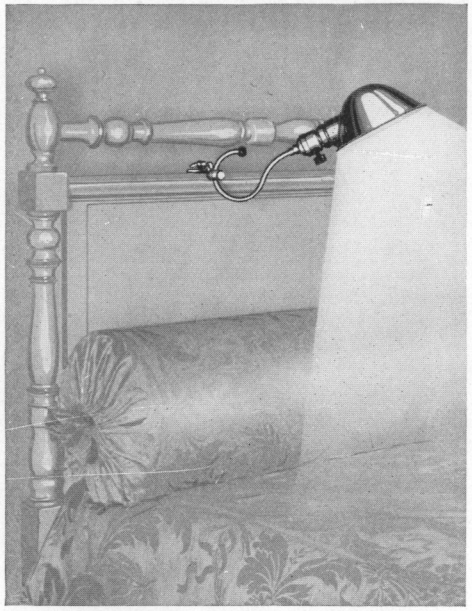
No. 16
On Vertical Rail

Lamp **No. 16** may be used on either a vertical or horizontal brass rail. Faries Bed Brackets are so constructed that they may be turned to any angle without adjusting clamp. When a soft, indirect light is desired, the shade may be inverted and the rays scattered on the ceiling.



No. 16
On Horizontal Rail

After all, the logical place for a light in the bedroom is right at the head of the bed—to go to bed by, to read by, to get up by. When you want to know what time it is, or whether or not the rain is coming in at the window, there is no need to get up and bump into chairs.



No. 17
For Wood Bed

Lamp **No. 17** is made with a special clamp for wood beds, and it may be clamped to any square-surfaced object from ⅜ to 1 inch thick —to the dresser or dressing table, for instance. These Faries Bed Brackets are all especially valuable in a sick room.

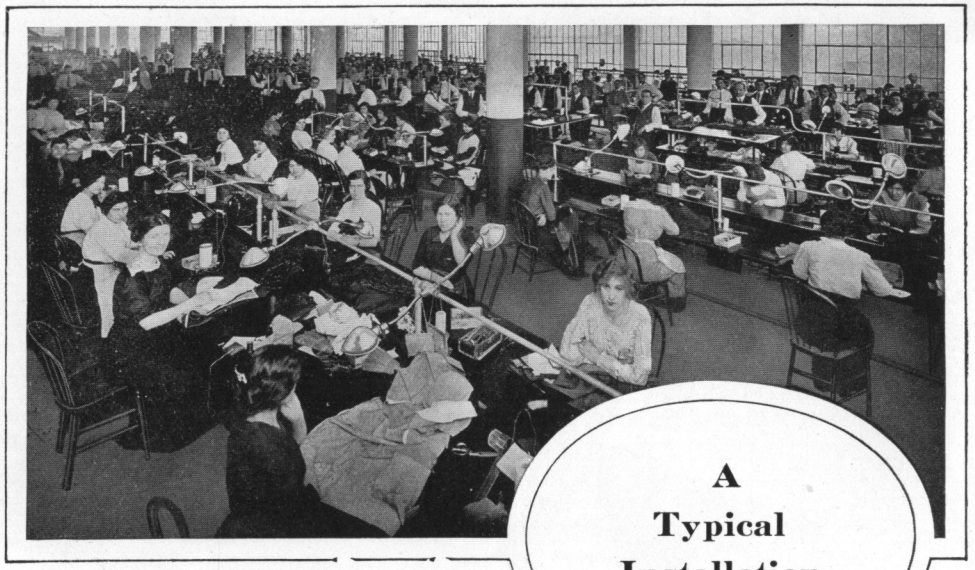
Flexible Arms In Actual Use

A TYPICAL INSTALLATION FOR A COMPOSING ROOM

These two pictures illustrate installations of Flexible Arms. These arms are practically indestructible, and are adjustable to any position so that each individual workman may adjust the light to his particular requirements, assuring more accuracy and efficiency. The saving in time and reduction of spoiled work soon pays for the installation.



A Typical Installation

SEVENTY-FIVE PER CENT

of spoiled work in manufacturing is due to inefficient lighting. With flexible arms and proper "FARIES" shades, you can spot your light where you want it, protect your workmen's eyes, speed up your production and reduce the amount of defective work.

Rear View of Shade Sliding Into Position

INTERCHANGEABLE SHADES

By the use of our patented principle, Verdelite Shades are mounted on a special holder and easily slide into place on the portable without the use of any tools or set screws.

Verdelite Shades are adjustable to any angle; are interchangeable, and may be removed instantly to conveniently clean, or to replace, as the occasion may require.

To detach, it is only necessary to use your two hands which instantly remove shade from slot, permitting replacement of shade without disturbing electric wiring or other elements.

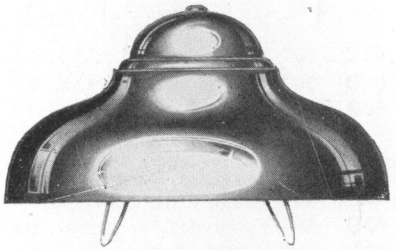
No.	36B	Brushed Brass	36	.80
No.	36C	Oxidized Copper	36	.90
No.	36D	Statuary Bronze	36	.90

The Collar Lock Holder is made in two pieces. The knurled ring is made to slip over the neck of the socket. It is split and formed with a groove in the lower end to fit over the bead or Uno screw thread of the socket. It also has slanting saw teeth slots cut upon opposite sides.

The other piece fastens rigidly to the shade and is provided with two prongs upon opposite sides which fit into the slot and the slanting saw teeth of knurled ring.

To apply, hold the knurled ring with the left hand and slip the prongs into the slot of the knurled ring. Turning the shade to the right will tighten shade on socket and allows for variation in size of sockets. This locks the shade, which will not pull off until released, yet will allow the shade to swivel on the socket.

To release the shade, push in or up on the shade as the case may be, until prongs are released by the teeth and turn shade to left.



No. 79
